DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Information Disclosure Statement

3. The information disclosure statement filed October 8, 2003 has been entered and considered. An initialed copy of the PTO-1449 by the Examiner is attached.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1, 3, 4 and 11 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Reed ('781).

The claims are considered to be met by Reed ('781) who discloses a system for measuring the distance including, inter alia, a noise code generator 11. Reed ('781) also discloses use of phase modulators (13a and 13b) and also that a baseband integrator and amplifier 19 amplifies small signals that emanate from the downconverter mixer 17 in the receiver path. When the received signal and the phase modulated LO signal mix and are synchronized in time, the data bit stream emerges from the mixer (see column 5, lines 5-26). Reed ('781) also discloses delaying a signal in transmitting a signal (see Figure 1).

6. Claims 1, 2, 4 and 11 are rejected under 35 U.S.C. 102(a) and/or (e) as being clearly anticipated by McEwan ('716).

The claims are considered to be met by McEwan ('716) who disclose a system for measuring the distance including, inter alia, a range-gated pulse Doppler system with a signal delay control means. The echo pulse is amplitude modulated at the mixer output while mixer outputs from the transmitted and mixer pulses resulting from self-mixing are not modulated (see column 2, lines 18-44).

Allowable Subject Matter

7. Claims 5-10 and 12 are allowed.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.
